

April 5-8, 2020
Saint-Malo, France

36th International Symposium on Microscale Separations and Bioanalysis

Abstract submission for posters:

There is still time until February 29, 2020

Deadline for submission of poster abstracts has been extended until February 29, 2020.

You also have a chance to win one of the 8 Awards/Prizes sponsored by AFSEP, ccCTA, The Royal Society of Chemistry (RSC), Wiley and the MSB organization.

TRAVEL GRANTS for Early Career Scientists

MSB 2020 conference strongly supports the participation of Early Career Scientists.

To help young scientists willing to attend MSB, a number of travel grants are available.

These grants can cover registration fees and/or transport costs and are either specifically provided by MSB sponsors or made available for members of national analytical chemistry societies from France, Switzerland, Belgium, Spain, The Netherlands, Germany and Czech Republic.

Our social event at MONT SAINT-MICHEL

Mont Saint-Michel has been listed as a UNESCO World Heritage Site since 1979.

The works to renew this site have recovered its maritime character, which made the monks choose this place to settle down in the Middle Ages.

Without such works, by 2040, Mont Saint-Michel would have been surrounded by salt plains.

The bay of Mont Saint-Michel is also the scene of the highest tides in continental Europe.

It is possible to observe this phenomenon, only a few days a year, and this will be the case on April 7 during MSB 2020!

The Mount will become an island again, for a few hours. During this time, the sea will completely surround the mount isolating it from the mainland.

You will have a great chance to observe this phenomenon.
